Weekly Report: 12/8/2022 - 12/13/2022

1. What we accomplished so far:
  - a. Backend: Added delete post functionality that deletes post from both frontend view and backend server; Added like functionality that changes likes counter in the frontend and backend.
  - b. Frontend: Added a sort menu on the home screen; Added a dropdown menu to allow users to select who can see their posts, to the signup screen for users to select their sex and to the drawer to allow users to select their status (Online, Away and Offline)..
2. What we plan to work on next:
  - a. Fix and finalize final presentation slides
  - b. Start working on the final report
  - c. Add the final project files to the website to finalize the website
  - d. See if we can get the web version working before the final submission date.
3. Technical problems/Issues we ran into and are working on:
  - a. Issue with trying to get the correct user's information when navigation from home screen to profile screen
